

You're Invited to Morgan State's EV Day!

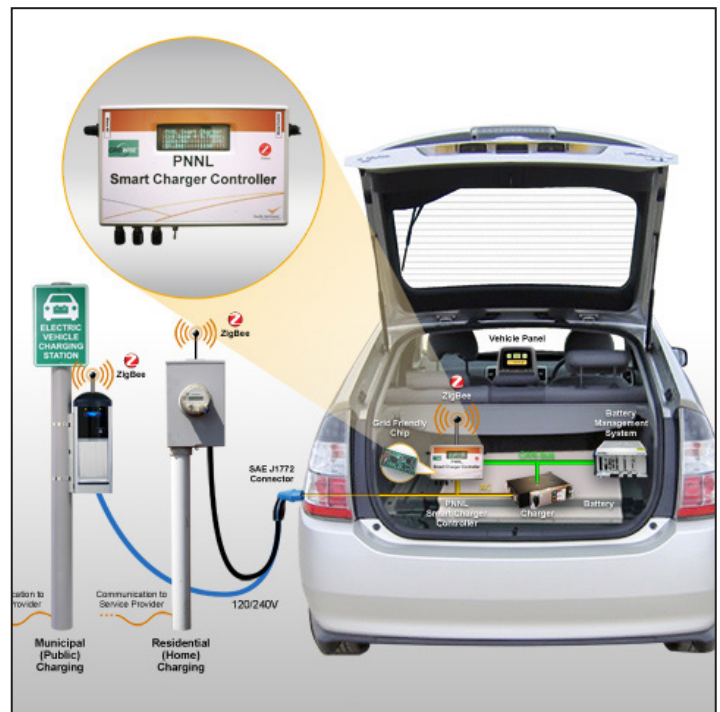

July 15, 2019

9:30-Noon

In the circle in front of the CBEIS
Building (between CBEIS and
Mitchell)

5201 Perring Parkway

We will have a display
and demonstration
of electric vehicles.

Curious about how EVs work?

You might know that a \$116,450 Tesla Model S can go zero to 60 in 2.4 seconds, but did you know a \$29,995 Chevy Bolt can do that in 6.5 seconds?

Did you know that Maryland has plans to add 300,000 EVs by 2025 and 5,000 more charging stations? Did you know EVs can go an average of 125 miles on a single charge with some going 335 miles? That you do not need a garage to have a charging station?
